

# Sequencing

Three stages, from more entropy to less entropy — security first, then reconstruction, then development.

Etapa 1 · combined · 0:54 — Cuba Stabilization Force — ports, runways, checkpoints and command in one cut.

## Etapa 1

STABILIZATION · FIRST PHASE

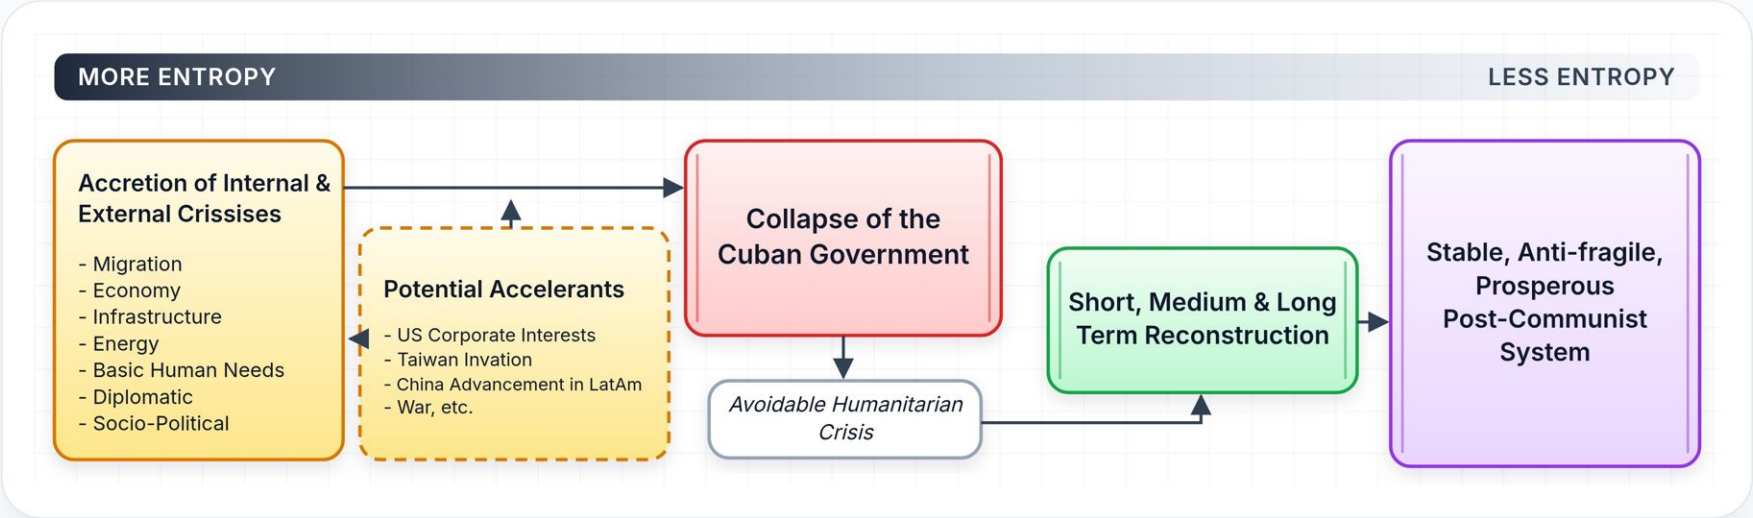

### Security

Control and lockdown of ports, airports and military installations by U.S. forces, alongside immediate humanitarian stabilization.

KEY MILESTONES

- Ports secured
- Airports & runways controlled
- Military installations locked down
- Checkpoints & Havana Command ops room
- Humanitarian aid corridors open

Crises / accelerants Collapse Reform / process Stable outcome Abolishment / radical reform New institutions Humanitarian crisis

ETAPA 1 CLIPS

Port secured

Forces take control of the harbor; cargo and access lanes locked down.

Runway control

Airports and runways secured for military and humanitarian flights.

Checkpoints

Checkpoints restore order on key roads and city access points.

Havana Command ops room

C.S.F. coordinates operations island-wide from a single command room.

Security overview

The security pillar: stabilization before reconstruction begins.

Etap 2 · combined · 0:52 — Energy, health and infrastructure rebuilt, end to end.

Etap 2

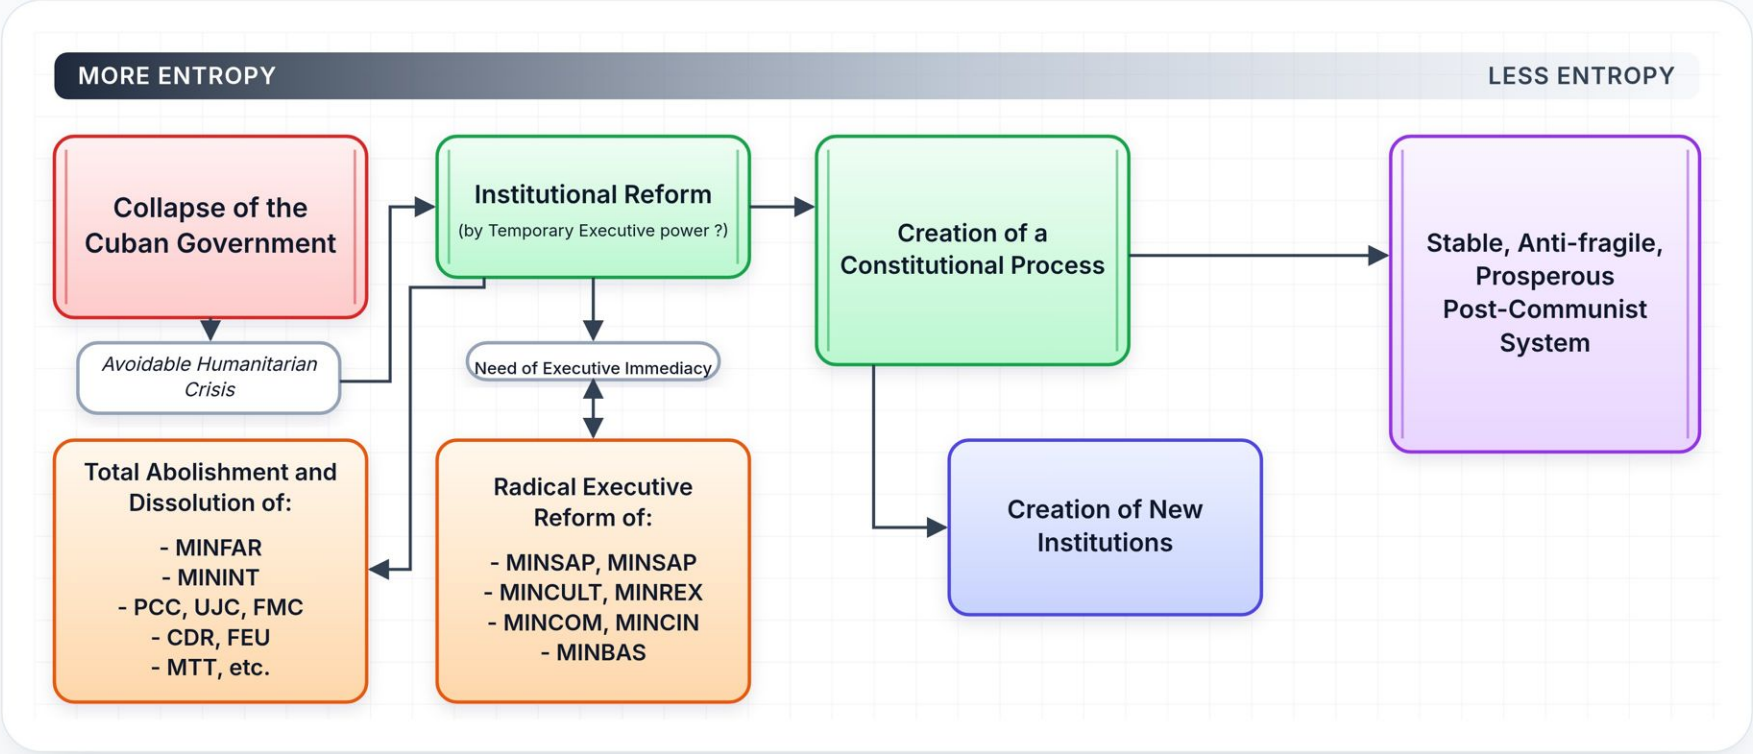

RECONSTRUCTION · SECOND PHASE

Energy, Health & Infrastructure

Restore the essentials: solar generation and a modern grid, hospitals, clean water, pipelines, and roads and bridges that connect the island.

KEY MILESTONES

- Solar farms & grid control
- Hospitals & clinics
- Water treatment & distribution
- Pipelines
- Roads & bridges
- Aid through the ports

ETAPA 2 CLIPS

Aid through the ports

Humanitarian cargo flows in through the newly secured ports.

Bridges

Bridges rebuilt to reconnect cities and production zones.

Solar generation

Solar farms bring new, distributed power online.

### Grid control

A modern control center stabilizes the national grid.

### Hospitals

Hospitals re-equipped and staffed to restore care.

### Clean water

Treatment and distribution bring safe water back.

### Pipelines

Fuel and water pipelines repaired and extended.

### Roads

Paving crews reopen the highways that connect the island.

### Energy overview

Generation, grid and fuel: powering the reconstruction.

### Health overview

Hospitals, clinics and supplies across the island.

### Water overview

Water treatment, distribution and sanitation.

### Roads overview

Highways and roads linking cities, ports and production zones.

Etapas 3 · combinado · 1:21 — AI government and the industries of the new economy.

## Etapas 3

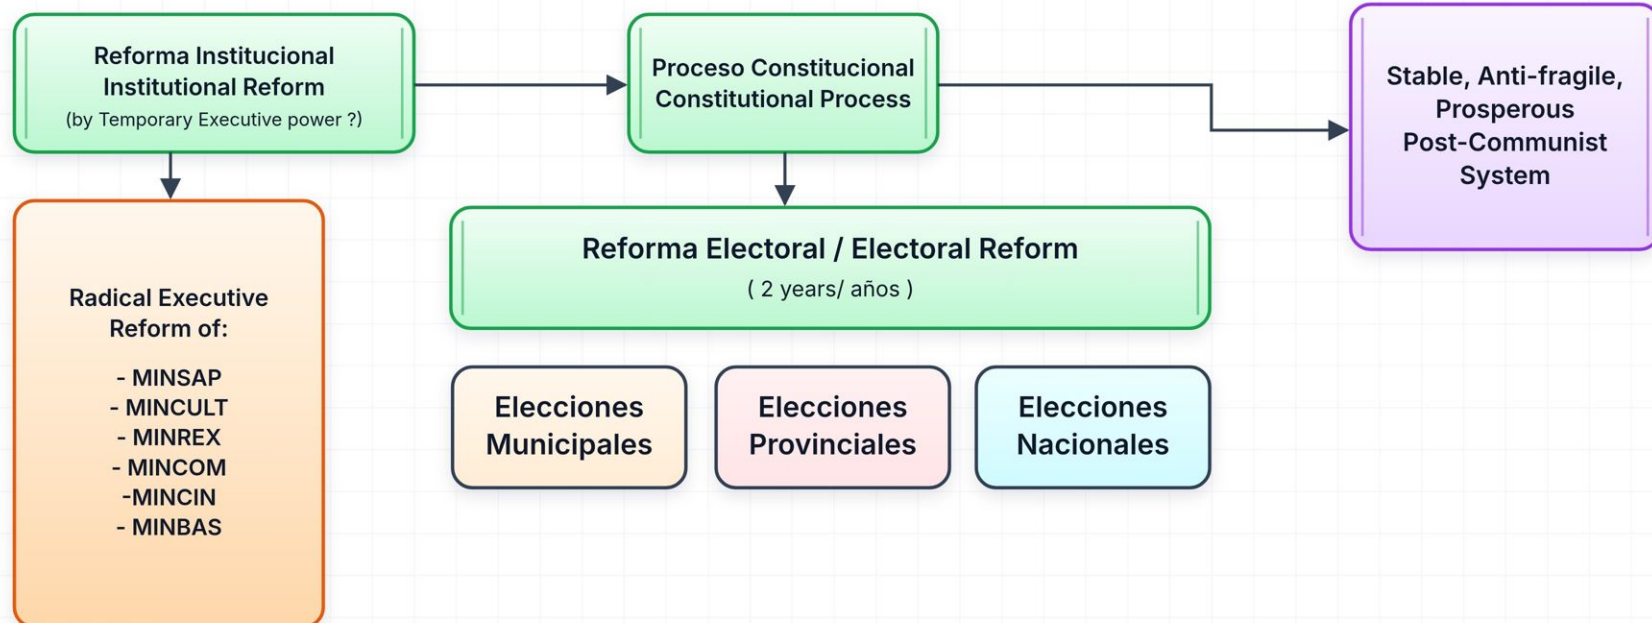

DEVELOPMENT · THIRD PHASE

### AI Government & Economic Restoration

The first AI-native government — public services on sovereign digital infrastructure — followed by economic restoration and development.

#### KEY MILESTONES

- AI Government
- Mines
- Materials & Refining
- Transport
- Shipbuilding
- EVs
- Chips
- AI
- Aviation
- eVTOL
- Space

## ETAPA 3 CLIPS

**AI Government**

The first AI-native government: public services on sovereign digital infrastructure.

**Mines**

Restarting Cuba's mining sector under modern standards.

**Materials & Refining**

Processing and refining raw materials on the island.

**Chips & Electronics**

Electronics and chip manufacturing for a high-tech economy.

**Space**

El Mariel, Cuba.

**Biodome**

Glass biodome by the bay.

Project Lead

**Ernesto Eduardo Dobarganes**
